Raghdan Abdulhameed Bakhsh

Architect & Project Engineer | CAPM Candidate

Professional Profile

Results-driven Architect and Project Engineer with specialized exposure to FMCG and industrial environments. Experienced in capital facility upgrades, regulatory coordination, and fast-track delivery. Skilled at bridging architectural design and execution using structured project governance, SAP procurement workflows, and authority compliance requirements.

Core Competencies

- Project Management: Capital budgeting, schedule control, risk management, stakeholder alignment
- Industrial / Facilities: HVAC & environmental control, cold storage integration, factory layouts and utilities
- Architecture: Space planning, interior detailing, facade development, 3D massing and visualization
- Tools: AutoCAD, Revit, Twinmotion, Lumion, SAP (PR/IO/PO), MS Office
- Strengths: Contractor negotiation, cross-functional leadership, problem solving

Professional Experience

Project Engineer

National Biscuit & Confectionery Co. (NBCC)

Jeddah, KSA | Feb 2025 – Present

- Coordinated facility upgrades and expansion support activities, including authority submissions and re-approvals.
- Supported industrial facade and main gate enhancements aligned with corporate branding and safer circulation flow.
- Led procurement support and implementation coordination for warehouse cooling / environmental improvements.
- Delivered administrative and executive workplace optimization while maintaining corporate identity standards.
- Managed cost control tasks including BOQ quantity checks and SAP procurement workflows (PR/IO creation).

Project Coordinator (Part-Time)

Ramadan Promenade Development (with SILA)

Jeddah, KSA | Seasonal / Part-Time

- Supported planning and delivery of a large public waterfront activation including retail and hospitality zones.
- Coordinated suppliers, installations, and readiness activities under compressed timelines.
- Assisted in translating design intent into site execution sequencing and logistics follow-up.
